EDUCATION

- **Worcester Polytechnic Institute (WPI)** Worcester, MA
Master of Science, Robotics Engineering , GPA - 3.7/4 Aug 2017 - May 2019
- **Rajiv Gandhi Technological University** Bhopal, India
Bachelor of Engineering, Mechanical Engineering with honors, CGPA - 7.8/10 May 2014

SKILLS

- Python, MATLAB, C++, JAVA, JavaScript
- Tensorflow, KERAS, OpenCV, ROS, scikit learn, PCL
- JSP, Servlets, Web Services, Databases(SQL, JCR, NoSQL)

WORK EXPERIENCE

- **Software Engineer Intern (Autonomous Vehicles), DriveMind LLC, NJ** June 2018 - Present
 - Working on the perception stack of self-driving cars using Camera and Lidar input
 - Implementing object detection and scene segmentation pipelines using deep learning frameworks(Caffe, Tensorflow) and state of the art algorithms like YOLO V3, RetinaNet, DeepLab
 - Developing lane boundary and derivable area detection modules to serve the path planner

PROJECTS

- **Pose Estimation using Deep Learning on Visual and LiDAR Odometry, WPI** Feb 2018 - Present
 - Implemented Recurrent - Convolutional Neural Network to learn the spatio-temporal representation from the RGB image sequences in KITTI odometry dataset
 - Used LSTM to take optical flow learnt by CNN as input and predict the robot's pose in 6 DOF
 - Used PCL to extract feature descriptors from LiDAR Point cloud data and implemented Pointnet neural network architecture to estimate robot's poses
- **Autonomous Robotic capture of flying objects using visual servoing, WPI** Feb 2018 - May 2018
 - Developed simulation environment in V-REP for ABB IRB 140 Robot using ROS
 - Used Microsoft Kinect to predict object's trajectory using OpenCV and curve fitting
 - Solved the problem of slow data acquisition using ROS and achieved real-time performance
 - Implemented PID controller for 6-DOF robot arm to capture the objects in flight through visual feedback
- **Real Time Vehicle Detection for Self-Driving Car using CNN, WPI** Oct 2017 - Dec 2017
 - Trained Deep Convolutional Neural Network on GTI vehicle image dataset and achieved 98% accuracy
 - Implemented transfer learning to detect vehicles in high dimensional images/videos from KITTI benchmark
Language and Technologies: Python, Keras, Tensorflow, OpenCV
- **Face Recognition and Scene Recognition, WPI** Oct 2017 - Dec 2017
 - Developed Eigenface and Fisherface algorithms from scratch in MATLAB using Principal component analysis for face Recognition. Compared algorithm performance with MATLAB computer vision toolbox
 - Implemented Bag of Words feature detector and Nearest Neighbour Classifier from scratch for Scene Recognition. Achieved Support Vector Machine level accuracy with hyperparameters tuning
- **Deep Reinforcement Learning, WPI** Sept 2017 - Dec 2017
 - Implemented Model Free Deep QLearning algorithm in Tensorflow
 - Used Open AIs cart pole environment to test the algorithm on an inverted pendulum model

PAST WORK EXPERIENCE

- **Software Engineer, Sapient Corporation, Bangalore** July 2016 - July 2017
 - Wrote reusable code in JAVA and OSGi for content management frameworks
 - Developed RESTful web services and servlets for e-commerce and customer facing applications
- **Systems Engineer, Infosys Limited, Pune** July 2014 - July 2016
 - Awarded with Aimer's award for outstanding software development in Digital Experience domain
 - Developed enterprise software components with object oriented programming(JAVA) and NoSQL databases
 - Worked on large code bases for performance tuning, platform migrations and feature enhancements
